Self taught developer

Self-taught developer (with a curious love of vaporwave) in industry looking to take on a more responsible role. Recognised for the ability to communicate and deconstruct complex details in a user-friendly format and liaise with users of varying technical competency levels. Establishes and develops projects to completion within stringent constraints and best practice. Quick and willing to assimilate and apply new work procedures while maintaining awareness of new and emerging technologies. Proactively identifies potential technology improvements which can support and enhance methodology and sound business practice in the commercial sector.

Professional Experience

Electric Circus   Sept 2021 - March 2023

Web Developer

- Worked as a primarily Frontend developer on a small development team and worked to expand my skills to cover backed development through Laravel
- Created custom client sites with Cornerstone LMS using Laravel and Nova CMS
- Worked closely with designers to create unique, tailored client websites in Wordpress
- Ensured current client WordPress sites are maintained and updated as necessary

Volcanic   March 2018 - Sept 2021

Frontend Web Developer

- Work as part of the Frontend Team to deliver high quality recruitment websites to global clients
- Identified a need for and worked with management to create a dedicated Support Developers Team
- Coached new hires and current staff joining the newly created team
- Headed a small team of support developers that handle day to day change requests, site issues and emergency fixes for current clients
- Resulted in less pressure on other developers, improving the quality of work put out by other departments and greatly increased customer satisfaction through reduced response times and a better quality of service for support issues

CDL   Dec 2016 - March 2018

Frontend Web Developer

- Worked as part of a team creating and maintaining websites and back-ends for many of the UK's top insurance companies.
- Developed change requests sent by clients to alter the appearance or functionality of their insurance websites.
- Ensured all clients' sites meet the currently enforced FCA regulatory guidelines.
- Updated sites to newer versions of CDL's JSP core code.
- Liaised with clients to ensure their requests are carried out to their specification and their satisfaction.
- Provided follow-up support for any errors or oversights discovered after a website had gone live and ensured a swift resolution with minimal downtime for the customer.

Education

University of Lincoln   2003 - 2006

Diploma of Higher Education
